

Kepware+: Enterprise Industrial Connectivity

Access and move OT data seamlessly and securely.

Digital transformation in manufacturing aims to enhance business performance through data utilization. However, accessing and managing data from diverse devices in manufacturing sites, whether brownfield or greenfield, poses challenges. Kepware+ addresses this by securely connecting industrial devices with OT and IT systems.

What might you discover when you have quality data for digital transformation? Learn more below.

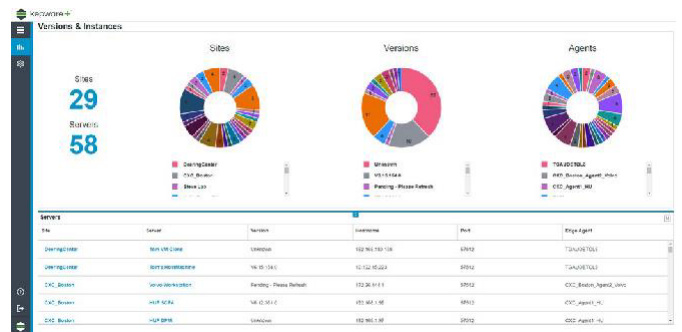

The Data Exists, But Access is the Existential Challenge

- **Difficulty Accessing Data from Assets** heterogenous, legacy manufacturing assets from multiple vendors with variation across lines, factories, and the enterprise.
- **Insecure Manufacturing Networks** unsupported and/or insecure protocols and remote access procedures creating cybersecurity risks.
- **Incomplete OT Data** missing data limits visibility, insights, and ability to make data-driven decisions.

Kepware+ Unlocks OT Data without Costly CAPEX Expenditures

- **Device Connectivity** rapidly collect data from most modern or legacy OT assets and normalize into a standard format, ready for use by OT & IT assets.
- **Cloud & Enterprise Integrations** easily and securely integrate data between OT and IT using pre-built integrations to cloud and enterprise applications.
- **Flexible Deployment** deploy easily into OT and IT infrastructures, including on-prem and hybrid cloud.

- **Enterprise Management** manage and monitor global OT data connectivity from a single pane of glass.

Interoperable OT Data Enables Business Outcomes

- **Accelerate Digital Transformation Initiatives** seamlessly access and move data, without costly hardware or machinery upgrades, to power digital transformation.
- **Reduce Cybersecurity Risks** modernize, standardize, and secure the movement of data from operations to the broader enterprise.
- **Improve Operations at Scale** enable data-driven decisions across to maximize throughput, lower costs, and improve asset efficiency.

Kepware+ is Marketing Leading, Industry Proven

- **Deep OT Domain Experience** 25+ year legacy of providing industrial connectivity solutions; dedicated focus on industrial connectivity.
- **Breadth of Device Connectivity Ability** to reliably access data from virtually any sensor, device or machine on the OT shop floor.
- **IT & OT System Agnostic** interoperable to seamlessly, securely move data between any IT and/or OT systems.

Kepware+ Frequently Asked Questions

- **What is Kepware+?** Kepware+ is our enterprise industrial connectivity solution. It includes the on-prem Kepware server, including all device drivers and plug-ins, and a SaaS user interface to view and configure on-prem servers at scale. Kepware+ enables seamless, secure access to OT data at enterprise scale.
- **What can Kepware+ connect to?** Kepware+ includes all device drivers enabling you to connect to virtually any device - legacy or modern. [See the full list of device drivers.](#)
- **How is Kepware+ deployed?** Kepware+ is a hybrid-cloud deployment model. Kepware Servers are deployed on-prem and the enterprise management capabilities are hosted in the PTC cloud.
- **Why Kepware+ versus KEPServerEX?** Kepware+ provides maximum value for those looking to standardize their OT data access and industrial connectivity at scale. KEPServerEX - sold ad-hoc by driver, suite, or plug-in - is best suited for small projects. Kepware+ minimizes administrative burden by activating all on-prem servers with a single license ID.
